

nucleobasecontaining  
 regulation compound cellular biosynthetic nitrogen expression  
**process** metabolic macromolecule

vesiclemediated organelle cellular secretion macromolecule  
**localization** transport establishment intracellular

system multicellular embryonic anatomical structure organismal  
**development** morphogenesis developmental organ

proteincontaining projection cytoskeleton assembly  
**organization** component organelle cellular biogenesis

compound substance organonitrogen external  
**response** stimulus signal cellular transduction wnt

positive transferase hydrolase activity  
**regulation** function molecular gtpase catalytic

**homeostasis** cation cellular chemical ion

**death** programmed apoptotic cell regulation

**activation** immune system leukocyte lymphocyte regulation cell

**population** proliferation cell regulation

**cycle** cell mitotic process regulation

organismal multicellular regulation system process

**adhesion** cellcell leukocyte aggregation regulation cell

**locomotion** motility cell migration positive regulation
